

# Savannah Highway Capacity and Intersection Improvements

## Purpose

Improve traffic flow and safety for all modes of transportation from Savage Road to Magnolia Road.

## Budget

\$48,800,000 from the 2016 Half-Cent Sales Tax.

## Status

Notice to Proceed for initial concept development of the project issued on May 10, 2018. The concept plan development will consist of traffic analysis and public involvement.

# Scope of Work

This project aims to reduce congestion and improve safety along the Savannah Highway Corridor.

This includes enhancements to intersections within the project limits, including:

Savage Road

Ashley Town Center Drive

Sam Rittenberg Boulevard

Skylark Drive

Orleans Road

Dupont Road

Wappoo Road

White Oak Drive

Markfield Drive

Oak Forest Drive

Magnolia Road

## Scope of Work

Throughout the design process, Transportation Development will seek input from stakeholders and the public.

Potentially provide sidewalk and/or multi-use pathway connections from Savannah Highway to the West Ashley Bike-way and West Ashley Green-way.

Investigate a complete street design to enable safe transportation for pedestrians, bicyclists, motorists, and transit riders.

This project does not include widening of Savannah Highway. Any potential improvements will be completed within the existing roadway limits.

Explore the possibility of converting overhead utilities to underground.
